Emhplast

*nothing less...
for your animals*

Company profile

Emhplast started its journey in 1973 as a mold production workshop. Over time we acquired a number of plastic injection machines and grew as plastic producers . Our production and warehouse facilities of 4,000 m² are located in Thessaloniki, Greece . Today Emhplast is a fast growing business in the field of poultry and livestock equipment plastics production. Our products are exported in more than 10 countries and we have a constant presence in international exhibitions.

We offer to our clients:

- More than 30 years of experience in the production of molds and durable plastic products, exclusively in our facilities.
- Productive capacity that allows rapid fulfillment of large orders overseas.
- Constant improvement of existing products and introduction of new innovative products.

Chicks drinker 1,5 lt

Material: Plastic (PP)
Capacity: 1,5 lt
Characteristics:
Ideal for chicks,
placed on the ground.

Code			L X D X H (cm)		€
01.063	50		-	0,14	

Chicks drinker 3 lt

Material: Plastic (PP)
Capacity: 3 lt
Characteristics:
Ideal for chicks, placed
on the ground.

Code			L X D X H (cm)		€
01.062	50		45 X 30 X 115	0,26	

Chicks drinker 6 lt

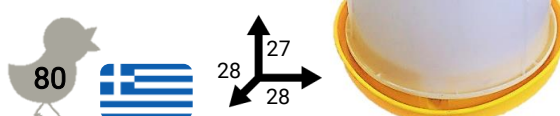

Material: Plastic (PP)
Capacity: 6 lt
Characteristics:
With shallow base
especially for chicks.

Code			L X D X H (cm)		€
01.067	10		30 X 30 X 70	0,50	

Chicks drinker 11 lt

Material: Plastic (PP)
Capacity: 11 lt
Characteristics:
With shallow base
especially for chicks.

Code			L X D X H (cm)		€
01.068	10		45 X 25 X 80	0,60	

Poultry drinker 6 lt economy

Material: Plastic (PP)
Capacity: 6 lt
Characteristics:
3 parts: tray, cone, lid.

Code			L X D X H (cm)		€
01.071	10		35 X 35 X 98	0,60	

Poultry drinker 11 lt economy

Material: Plastic (PP)
Capacity: 6 lt
Characteristics:
3 parts: tray, cone, lid

Code			L X D X H (cm)		€
01.070	10		45 X 25 X 80	0,70	

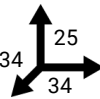

5 lt, 10 lt, 20 lt poultry drinkers with threaded plug and push in legs.

The drinkers are equipped with a new ergonomic handle with hole (for hanging) and a set of 4 push in legs, which position the drinker 7 cm above the ground, thus reducing water spillage and the risk of ground dirt dropping in the tray water.

Poultry drinker 5 lt

Material: Plastic (PP)
Capacity: 5 lt

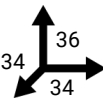

Code			L X D X H (cm)		€
01.801	10		35 X 35 X 65	0,60	

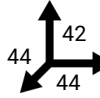

Poultry drinker 10 lt

Material: Plastic (PP)
Capacity: 10 lt

Poultry drinker 20 lt

Material: Plastic (PP)
Capacity: 20 lt

Code			L X D X H (cm)		€
01.802	10		35 X 35 X 95	0,75

01.841	2	66 X 66 X 35	5,00	

Plastic nest boxes for free range layer farms. The plastic floors are designed with a small inclination. The eggs slide to the protected shelves where they can be collected.

Our nest boxes offer the following advantages:

- Eggs remain clean
- Save broken eggs, prevent cannibalism
- Plastic material is easy to clean and offers mild temperature variations during the summer and winter months.

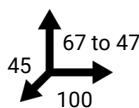

Laying nest – 1 m wide

Material: Plastic- metal sheet

Capacity: Up to 50 hens

Characteristics:

Ideal for hobby farmers. The nests should be placed on a base 40-50 cm from the ground.

Code			L X D X H (cm)	 kg	€
01.078	1		102 X 52 X 18	11,0	

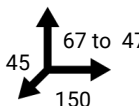

Laying nest – 1,5 m wide

Material: Plastic- metal sheet

Capacity: Up to 75 hens

Characteristics:

Ideal for hobby farmers. The nests should be placed on a base 40-50 cm from the ground.

Code			L X D X H (cm)	 kg	€
01.079	1		152 X 52 X 15	16,0	

Poultry house all in one

Hen house for hobby farmers.

Capacity: 10-15 hens.

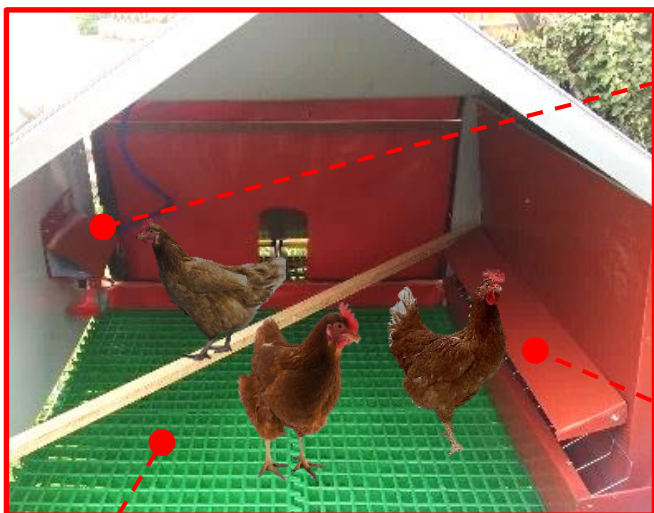

With plastic floor and embedded laying nest 1 m (Code 01.078).

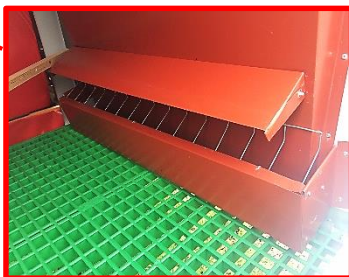

Ideal for any garden, with integrated automatic nipple drinking system, large feeder with external tank and collection of clean eggs externally from the plastic nest. The house includes plastic slat floor and zigzag doors that prevents intruders from entering.

The eggs are collected from the externally positioned shelves.

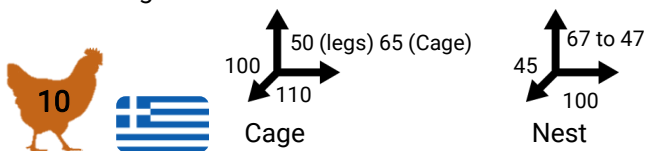

The house interior includes an automatic nipple drinking system which is connected to an external water tank with a capacity of 25 lt.

The house interior includes a large linear feeder with a tank that fills externally.

Plastic floor throughout that enables all the dirt to fall to the ground.

Egg washing machines Rotomaid

Description: Egg washing and sanitizing machine. Includes motorized base which oscillates gently, a water bucket with thermostatically controlled heater and a basket for egg collection / washing.

Use: Neutralizes the large natural bacterial load on the egg shell, including any pathogenic species present. Reduces the risk of cross contamination with pathogens from the surface of eggs into other food substances..12 months warranty. For full operation manuals, please visit our website, www.emhplast.gr.

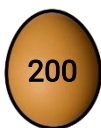

Egg washing machine Rotomaid 100

Capacity: 100 eggs
Bucket with programmable thermostat that maintains the water temperature between 35-45° C .
Base: Powerful motor.

Egg washing machine Rotomaid 200

Capacity: 200 eggs
Bucket with programmable thermostat that maintains the water temperature between 35-45° C .
Base: Powerful motor.

Automatic nests

Emhplast offers complete solutions for the installation and operation of professional poultry houses. Contact us for detailed solutions to your specific plans.

Professional poultry houses consist of the following systems:

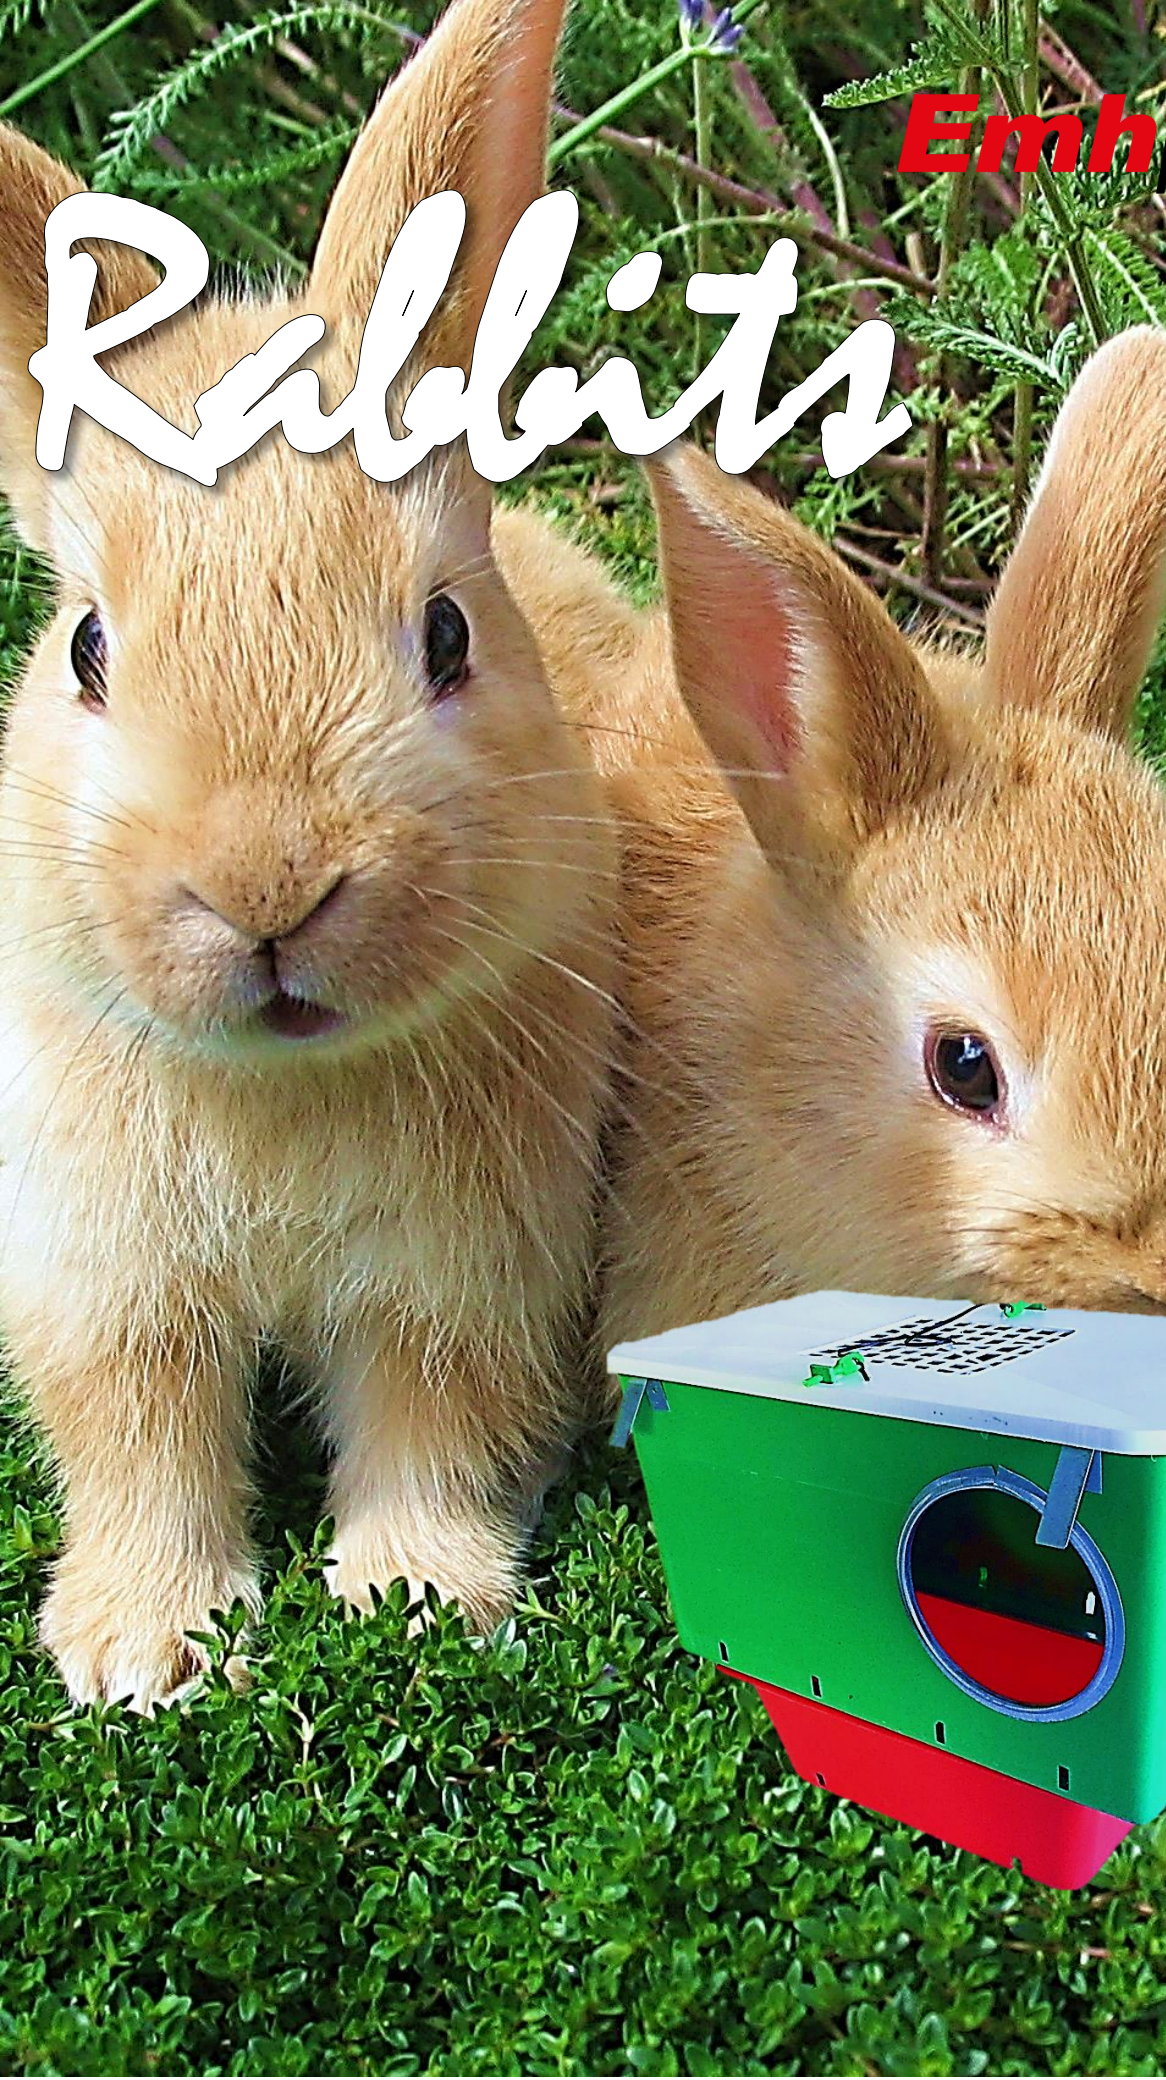

1. Automatic nests with egg conveyor
2. Automatic drinking systems
3. Automatic feeding systems
4. Plastic floor slats & galvanized metal frame

Automatic feeding systems

Our company supplies automatic feeding systems from renowned European manufacturers. Automatic feeding systems consist of 3m galvanized tubes with 45mm diameter, spiral with holes where feeding pans are adjusted (broiler, layer, cockerel, female breeder), driving units with sensor. The driving unit moves the feed from the 1st to the last pan. Hanging systems are also available in automatic or manual configuration.

In Emhplast we supply the award winning ECO LINE series of nipple drinkers for pigs. The ECO line owes its name to the ECO automatic regulator mounted on these drinking nipples. ECO regulators provide the required optimal and constant water flow rate from the first to the last pig drinker in the entire pig house, regardless of input water pressure.

For more technical details regarding the selection of the most suitable nipple according to the type of pig (piglet, weaner, nursing sow, boar etc) please consult the relevant technical table in our website, emhplast.gr
